Impact:	No impact as this is a research ticket.	**Software Version:**	

Description

The pixel2map program has some confusing documentation that needs to be cleaned
up. This spike is to look over the pixel2map source code and documentation to become familiar
with it and includes examining existing use cases as well as:

- VIMS: what not to do
- CRISM
- Dawn VIR

This is ticket involves just looking over the source code, and familiarizing oneself with the application.
